

Grant Sharp, Green Party, Fort Rouge

Here are my responses to your questions.

1) Lake Winnipeg is this provinces most treasured resource and needs to be treated as such. For far too long the existing government and those governments before it have failed to take action to resolve the many issues faced by the lake and those who depend on it. If elected, the Green Party of Manitoba would take immediate, purposeful and deliberate action to end the bureaucratic gridlock. I am no expert in this field, but even as a layman, I recognize that drastic action is required today, not in four years from now. For more Information on the Green Party's approach to solving the issues surrounding Lake Winnipeg, please take a minute to read [Kate Storey's post on the Green Party of Manitoba website.](#)

2) Yes all of them

3) Yes

4) I would differ to our experts to work collaboratively with officials on the ground to develop a solution and implement it with haste.

5) Yes, Freshwater is our most valuable resource. It's health must be a top priority and it should not be subject to partisan politics.
