CALL TO ACTION: Governments must focus on phosphorus at Winnipeg’s largest sewage plant

We need your help.

Today, the North End Water Pollution Control Centre Project (NEWPCC) Steering Committee, comprised of representatives from both the city and the province tasked with implementing an interim phosphorus reduction plan to improve the health of Lake Winnipeg, released an updated plan.

LWF, along with our partners at the International Institute for Sustainable Development (IISD) and the Lake Winnipeg Indigenous Collective (LWIC), released a joint statement in response.

In 2019, both governments committed to accelerate phosphorus reduction at the NEWPCC. We’re concerned that the...

American high-school students join LWF’s water sampling efforts
Grade 10 Biology students from Minot, North Dakota, are the newest citizen scientists to join the Lake Winnipeg Community-Based Monitoring Network (LWCBMN).

As part of their honours class, a small group of students from Minot’s Central Campus have volunteered to collect samples from the Souris River, using equipment supplied by LWF and following LWCBMN protocols developed by LWF science advisors. Their teacher was trained by LWF staff over Zoom.

LWCBMN is a long-term monitoring program coordinated by LWF which mobilizes citizens to collect water samples across rural areas of Lake Winnipeg’s...

**Update on proposed Red River nutrient targets: international commission disregards best-available data**

News
LWF
October 1, 2020
0

On Sept. 16, the International Joint Commission (IJC) announced it had submitted its recommendations on proposed Red River nutrient targets to the governments of Canada and the United States.

Recommended targets for the Red River at the boundary between the two countries include concentration objectives for phosphorus and nitrogen (0.15 and 1.15 milligrams per litre, respectively), as well as recommended annual loads for both nutrients: 1,400 tons for phosphorus and 9,525 tons for nitrogen.

The IJC’s decision to recommend nitrogen reduction as a strategy to reduce the frequency and severity of...

**Recommendations for an effective Manitoba Water Management Strategy**

News  
LWF  
September 22, 2020  
0

In 2018, the Manitoba Climate and Green Plan Act established an Expert Advisory Council to provide advice and recommendations to the Minister of Conservation and Climate. In August, this council solicited stakeholder input on a provincial water management strategy for Manitoba.

Our submission advocates for a science-based, outcome-focused strategy to effectively translate policy into meaningful practice to safeguard our shared waters. Such a strategy must be supported by robust evidence, include measurable targets and defined timelines for action, and strengthen monitoring and reporting...

**Update: Bike to the Beach 2020 a huge summer success**

News  
LWF  
August 13, 2020  
0

Perfect weather conditions, the camaraderie of fellow cyclists and a record-breaking amount of money raised in support of a healthy Lake Winnipeg: in all aspects, the inaugural Bike to the Beach ride was a huge success.

Forty-three cyclists took part in the 2020 “founders’ ride,” a 130 km route from Winnipeg to Victoria Beach on Aug. 7. Looking sharp in matching jerseys and helped along by the energy of their fellow riders (and a much-welcomed south wind!), the group rose to the challenge – and had a lot of fun, too.
In addition to the passion and determination of the cyclists involved, Bike...

**Have your say on Red River water quality standards**

Update: The deadline for public feedback on the IJC’s proposed nutrient loading targets and concentration objectives has been extended until March 28, 2020.
The International Joint Commission (IJC) works to prevent and resolve transboundary water disputes, investigating issues and recommending solutions to the governments of Canada and the United States. Guided by the Boundary Waters Treaty, which was signed in 1909, it was established in recognition that each country is affected by the other’s actions in lake and river systems along the border.

The IJC is currently soliciting public feedback...

Plan released for phosphorus removal at Winnipeg’s North End sewage plant

A plan outlining next steps for both interim phosphorus reduction and full upgrades at Winnipeg’s North End sewage treatment plant was released today.

The plan was developed by a project steering committee for the North End Water Pollution Control Centre (NEWPCC), which includes representatives from both the city and the province.

The NEWPCC is the largest of Winnipeg’s three wastewater treatment facilities and the single largest point source of phosphorus to Lake Winnipeg. Excess amounts of phosphorus in freshwater ecosystems drive the growth of potentially toxic algae. Currently, the NEWPCC...

Federal policy and Lake Winnipeg’s health: a look ahead

In December, shortly after shuffling his cabinet, Prime Minister Justin Trudeau issued mandate letters to all federal ministers. Continuing a practice started by Trudeau in 2015, these letters have been released publicly and are available on the Office of the Prime Minister’s website.

Mandate letters outline the Prime Minister’s expectations for each minister, including specific policy objectives which each minister is expected to accomplish.

The health of Lake Winnipeg is both a national priority and a cross-cutting file. Achieving meaningful positive change will require attention and...

Update on Winnipeg sewage: Provincial regulators deny city request for licence extension, commit to accelerated phosphorus reduction

Update on Winnipeg sewage: Provincial regulators deny city request for licence extension, commit to accelerated phosphorus reduction

Update on Winnipeg sewage: Provincial regulators deny city request for licence extension, commit to accelerated phosphorus reduction
Thank you to everyone who has advocated for protecting Lake Winnipeg through improved wastewater treatment. We have an exiting update to share.

On Dec. 5, the Manitoba government denied the City of Winnipeg’s request for a two-year extension to develop a plan for phosphorus reduction at the North End Water Pollution Control Centre (NEWPCC).

Instead, the province is requiring that an interim phosphorus reduction plan be in place by Jan. 31, 2020.

The province will also assist the city move forward on plans to fully upgrade the NEWPCC so that it meets all requirements of its operating licence...

Two-thirds of Manitobans agree upgrading Winnipeg’s north end sewage treatment plant is an urgent civic priority: poll

With just one week until Winnipeg’s election, new polling results show citizens want immediate action taken to improve city sewage treatment.

In a survey conducted by Probe Research*, nearly two-thirds of Manitoba adults (65%) agree that upgrading Winnipeg’s north end sewage treatment plant should be “a very urgent priority.”

The North End Water Pollution Control Centre (NEWPCC) treats approximately 70 per cent of the city’s wastewater. The NEWPCC is currently the fourth largest phosphorus polluter among all wastewater treatment facilities in Canada and the single-largest point source of...  

Oppportunity for action: prioritizing Winnipeg sewage treatment

Winnipeg’s aging wastewater infrastructure is putting Lake Winnipeg at risk – which means civic leaders have a responsibility to take action.

Excessive amounts of phosphorus flowing into Lake Winnipeg from a variety of sources are causing potentially toxic algae blooms. Undertreated city sewage is one of these sources. Toilet water ultimately becomes lake water – all that stands between the two is our wastewater treatment system.

Winnipeg’s North End Water Pollution Control Centre (NEWPCC) treats approximately 70 per cent of the city’s wastewater. The NEWPCC is currently the fourth largest...  

Co-op student job opportunity

Winnipeg’s aging wastewater infrastructure is putting Lake Winnipeg at risk – which means civic leaders have a responsibility to take action.

The RM of Victoria Beach was one of eight included in a 2017 study of south basin real estate. Photo: Paul Mutch

A 2017 study commissioned by LWF confirms that Lake Winnipeg property values make significant contributions to Manitoba’s economy.

Conducted by Scatliff + Miller + Murray and BW Ferguson & Associates, the analysis considered residential and cottage properties around the lake’s south basin, extending south from Riverton on the west side and south from Victoria Beach on the east side. Roughly bounded by Highways 8 and 59, the study area encompassed portions of eight rural...

Citizen scientists find phosphorus hotspots across Manitoba

News
LWF
March 21, 2018
0

March 22 is World Water Day and we're celebrating with the release of new water-quality data generated by the Lake Winnipeg Community-Based Monitoring Network (LWCBMN).

LWCBMN is a growing network of citizens, scientists and conservation professionals. Since 2016, LWCBM volunteers and staff have been collecting water samples across southern Manitoba using scientifically vetted protocols. Samples are then analyzed in a lab to measure phosphorus concentration and determine the amount of phosphorus being exported off our landscapes.

Excess phosphorus is the primary cause of potentially harmful...

Lake Minnewanka, in Banff National Park. Its Nakoda name means "water of the spirits." Photo: Kirsten Earl McCorrister

LWF has been hard at work coordinating a new community-based monitoring (CBM) program here in Manitoba, having recently completed a CBM pilot project to test for phosphorus in the tributaries that feed into Lake Winnipeg. We are not alone in our efforts to understand and improve the health of our waters. Across Canada, water groups are collaborating with citizens and governments to understand the threats to clean water and work for solutions. LWF has had the opportunity to...

“In the end we will conserve only what we love. We will love only what we understand. We will understand only what we are taught.” — Baba Dioum, Senegalese conservationist

Donate at the link below to send Manitoba students on their next water adventure.

The wonder of new discovery is a special thing.

We all remember the first time we had the chance to experience our natural ecosystems: The first time we went out in a boat on open water. The first time we saw a dragonfly up close. The first time we caught tadpoles in a bucket.

We all remember the first time we truly understood that we are all...

An annual lake tradition expands online

Walk for Water is the largest grassroots fundraising event in support of a healthy Lake Winnipeg. For many lake-lovers, participating has become an annual family tradition.

Three walks are being held this season in Dunnottar (July 24), Gimli (Aug. 7) and Victoria Beach (Aug. 7), organized by community volunteers with support from LWF. Proceeds are used to translate science into solutions: funding research, training citizen scientists, educating students and community groups, and addressing the root causes of harmful algae blooms by advancing the eight actions of the [Lake Winnipeg Health Plan](#).

Manitobans expect political leadership on Lake Winnipeg: poll

With the provincial election just one week away, a new poll reinforces the importance of Lake Winnipeg to all Manitobans.

The online survey of 882 Manitobans was conducted by Probe Research Inc. for the Lake Winnipeg Foundation (LWF). Among the findings:

• 94% of Manitobans agree Lake Winnipeg is worth protecting
• 91% agree the health of lakes and rivers is very important to the quality of life in Manitoba
• 80% agree that Lake Winnipeg is one of Manitoba’s most important natural resources

“We are not surprised by these numbers. They reinforce what I think all Manitobans already know: the health of... Read more about Manitobans expect political leadership on Lake Winnipeg: poll
Manitoba parties and candidates respond to Lake Winnipeg questions

Clean Environment Commission report on Lake Winnipeg regulation

News
LWF
October 30, 2015
0
On Oct. 19, the Manitoba government released the Clean Environment Commission’s report on Lake Winnipeg regulation.

The CEC and its role

The Manitoba Clean Environment Commission (CEC) is an arms-length provincial agency established to provide advice and recommendations to the minister of conservation and water stewardship, and to develop and maintain public participation in environmental matters. Its recommendations are not binding; the minister reviews them and chooses whether to adopt them.

The scope of the recent report

The CEC was asked to conduct a review and gather public input on...

**A call to action for federal leadership on fresh water**

News  
LWF  
September 22, 2015  
0

This August, Manitobans were confronted with a graphic reminder of the challenges facing Lake Winnipeg when algae washed up on Hillside Beach.

Excessive phosphorus flowing into the lake from many different sources throughout its vast watershed is contributing to the increasing size and frequency of harmful algae blooms such as this one – but Lake Winnipeg is not the only water body in need of help.

Across the country, mounting pressures on rivers, lakes and streams are closing beaches, compromising drinking water supplies, impacting fisheries and undermining the health of aquatic ecosystems...

LWF was founded in 2005, making this year our 10th anniversary!

We’re proud of our grassroots beginnings and the many passionate supporters whose dedication to our collective vision of a clean, healthy Lake Winnipeg and watershed, now and for future generations, has shaped LWF into what we are today.

We’re also proud of what we’ve been able to accomplish over the past decade: educating citizens, funding projects, and collaborating with governments, researchers and other stakeholders.

We’ve made progress – but our work is far from finished. Lake Winnipeg...

Happy World Wetlands Day!

News
LWF
February 2, 2015
0
On Feb. 2, 1971, an intergovernmental treaty called the Ramsar Convention was adopted. Named for the Iranian city in which its adoption occurred, the convention came into force in 1975 to provide a framework for the conservation and wise use of wetlands and their resources. (You can learn more about the Ramsar Convention [here].)

Today, almost 90 per cent of UN member states – including Canada – are considered “contracting parties.” Contracting parties implement the Ramsar Convention and collaborate on shared projects. More than 2,000 wetlands across the globe (37 in Canada) are currently...

Have a great idea for a project that can help save our lake? We can help make it happen!

LWF’s Stewardship, Research and Education Grants Program supports projects working to improve water quality in Lake Winnipeg and its watershed – particularly those which address one or more of the eight key actions to reduce nutrient loading identified in our [Lake Winnipeg Health Plan](#).

Past projects have included educational resources, water-quality sampling and monitoring programs, video projects and various research projects.

The deadline for Spring 2015 grant applications is March 1, 2015. More...

LWF has awarded a total of $21,500 to three projects as part of our Stewardship, Research and Education Grants Program. Fall 2014 grants will support:

- **Caring for our Watersheds**: a contest run by Oak Hammock Marsh Interpretive Centre in which high-school students will submit proposals on how...
they can help their watershed, with a goal of implementing as many projects as possible.

- Determining extent...

0

Winnipeg – Members of Living Lakes Canada from Wildsight and the Lake Winnipeg Foundation (LWF) represented Canada at the 14th Living Lakes Conference in Nanchang, China last week. Kat Hartwig of Invermere, B.C. and Alex Salki of Winnipeg, Manitoba, were invited to present their work on sustainable management of lake communities, with a special focus on lake protection. The Canadian presentation focused on the significant water stewardship work being done by NGOs and water stewardship groups in the Columbia Basin and around Lake Winnipeg.

The conference hosted 350 delegates from 33 countries...

A new publication is celebrating the multitude of benefits offered by Manitoba’s wetlands!  

*Nature’s Wealth* is a joint release from LWF, Ducks Unlimited Canada (DUC) and the International Institute for Sustainable Development (IISD).

The four-page feature delves into the ecological and economic value of wetland areas – everything from water purification, flood protection, wildlife habitat, biofuels, recreational opportunities and even food!
It also highlights some of the conservation, policy and research initiatives currently underway across the province; readers get to meet research...

The Lake Winnipeg Foundation will bring local, science-based solutions to the 14th Living Lakes Conference in Nanchang, China, an event hosted by Global Nature Fund (GNF), a non-profit environmental foundation with headquarters in Germany.

From Nov. 18 to 24, representatives from some of the 104 members of GNF’s international network will be discussing lakes in densely populated areas and how best to balance people and nature. LWF is a founding member of Living Lakes Canada, one of six national Living Lakes networks working throughout the world to protect freshwater resources.

In 2013, GNF...

Oct. 17, 2014 - The Lake Winnipeg Foundation was pleased to be one of the 110 freshwater organizations and groups in attendance at Living Waters Rally 2014. This biennial gathering took place Oct. 3 - 6 in Ottawa/Gatineau and was organized by the Canadian Freshwater Alliance, of which LWF is a member.

Representatives from recreational, Indigenous, cottage association, faith, philanthropic, environmental, business, academic, and arts and culture groups spent the weekend discussing the future of Canada’s freshwaters. The following statement was released by the Canadian Freshwater Alliance upon...

At LWF, the success of our work is dependent on the support of lake-lovers who share our vision of a clean, healthy Lake Winnipeg now and for future generations. We are committed to improving our communication with current members and growing our capacity as an organization.

To get to know you better, we have created a short online survey for our members, and for those who support us in other ways. By filling it in, you will be helping us shape our future efforts. Please note all information is kept confidential and will not be shared outside of LWF.

As a special thank-you, we're offering...

A wild and precious week

News

LWF

October 14, 2014

“Tell me, what is it you plan to do with your one wild and precious life?” – Mary Oliver, American poet

The late-June sun was setting as we pushed away from the culverts off Highway 314 just northeast of Lac du Bonnet, the starting point of the Manigotagan Canoe Route. Three friends and I were about to begin a white-water adventure through the Manitoba wilderness, navigating rapids as we paddled our way towards Lake Winnipeg. We had five days to complete over 100 km.

The Manigotagan River winds its way through the boreal forest, which sustains all kinds of life. As we made our way along the...

Mayoral candidates commit to saving Lake Winnipeg

News

LWF

October 1, 2014

We’re pleased to report some encouraging news for the health of Lake Winnipeg from Sept. 30’s mayoral forum on environmental issues.

One of the three pre-determined questions posed to the six mayoral candidates in attendance (Gord Steeves was absent) concerned wastewater treatment.
Excess amounts of phosphorus are causing harmful algae blooms on Lake Winnipeg. City of Winnipeg wastewater treatment plants represent the single largest point source contributor of phosphorus to Lake Winnipeg. Winnipeg's North End Water Pollution Control Centre treats more than two-thirds of the city's wastewater...

A few seconds and a few mouse clicks, and a good idea could become a reality!

We've entered the [Aviva Community Fund](#), a three-month competition in which community groups and organizations across the country vie for a share of $1 million in project funding from insurance provider Aviva Canada. Now, we need your help!

Here's how it works: There are five funding categories, two budget categories and three qualifying rounds. In each qualifying round, the 40 ideas which receive the most votes in each of the categories will move on to the semi-finals. Those 120 ideas will then be voted on again to...

LWF’s work was recently featured in an article by DeSmog Canada as part of its “Ripple Effect” series, a collection of stories about efforts to protect Canada’s fresh water.

Along with Brokenhead Ojibway Nation and the Centre for Indigenous Environmental Resources, LWF helped organize the gathering of First Nations mentioned in the article. We recognize that the unique and too often marginalized voices of Indigenous peoples are a vital part of any sustainable solutions for Lake Winnipeg, and we feel privileged to be able to help facilitate this process.

“Just as ripples spread out when a single pebble is dropped into water, the actions of individuals can have far-reaching effects.” – Dalai Lama
The Lake Winnipeg Foundation is excited to announce our participation in Small Change Fund’s National Freshwater Fund campaign!

**Small Change Fund** is a Canadian organization that connects small grants to big change. Since December 2009, it has harnessed the collective power of small gifts from individual donors to raise over half a million dollars for grassroots initiatives and provide over 167 micro-grants from coast to coast.

Starting today...

Attention all LWF members: You’re invited to a special Lake Winnipeg Foundation members’ meeting.
The purpose of this special meeting is to ratify approval of motions made by the Board of Directors, in compliance with the Canada Not-for-profit Corporations Act, as required by Corporations Canada.

In order to be in compliance with the act and maintain our charitable status, we need the support of two-thirds of members in attendance at this meeting. New members are welcome...

#LoveTheBoreal Photo Contest

At LWF, we love Lake Winnipeg – and we also love the boreal forest. (Did you know that approximately two-thirds of the water that ends up in Lake Winnipeg filters through the boreal forest? That's just one of the reasons why Conserving the Boreal Forest is Action 2 of our Lake Winnipeg Health Plan.)

If you love Manitoba's boreal forest, too, we've got some exciting news for you: LWF has partnered with six other organizations to bring you a fun photo contest with some amazing prizes!

The #lovetheboreal photo contest is open to amateur and professional photographers. There are four categories...
June 24, 2014 – This summer, Anishinabe woman Katherine Morrisseau-Sinclair – accompanied by family, friends, and community members – is taking steps to heal Lake Winnipeg. Footsteps, water ceremonies, prayer, and song will accompany women and men on the three-week walk. Starting July 12, they will walk 1,032 km around the perimeter of the lake to raise awareness about its declining health and offer hope for its revival. The traditional water walk starts in Norway House and ends in Manigotagan.

“Katherine’s walk is bringing an important perspective to the protection of water,” says Marlo...

Making our mark on water

The Lake Winnipeg Foundation is excited to announce our sponsorship of the award-winning documentary film Watermark at this summer’s Gimli Film Festival.

The film is a diverse collection of images and stories from around the world that examine the deep relationships that humans have with water. The stories span from floating farms off China’s Fujian coast to the Colorado River’s desert delta to the Stikine River watershed in northern British Columbia.

“We hope Watermark will inspire people to think about their relationship to the water they interact with – especially Lake Winnipeg,” says Marlo...

Government, industry and ENGOs come to the table to save Lake Winnipeg: (l to r) Gord Macintosh, Manitoba's minister of conservation and water stewardship, Doug Chorney, president of Keystone Agricultural Producers, and Alexis Kanu, executive director of the Lake Winnipeg Foundation.

June 11, 2014 – The Lake Winnipeg Foundation is encouraged by today’s provincial announcement of a new surface water management strategy for Manitoba and proposed changes to drainage regulations to protect threatened seasonal wetlands.

In particular, LWF is pleased by the government’s commitment to the principle of...

**Pelly's Lake Project breaks ground!**

**News**  
*LWF*  
May 30, 2014  
0

Nestled in the rolling hills about four km east of Holland, Man., is the site for Pelly’s Lake Watershed Management Project.

“Not every project comes with a view like this,” said Justin Reid, Manager of the La Salle Redboine Conservation District (LSRBCD), at the site of the soon-to-be-built interpretive park.

The park overlooks 630 acres (about half the size of Assiniboine Park) of hay and pasture land that will be covered in water next spring. Pelly’s Lake will be approximately two metres deep in the middle and just over one meter deep around the marshy edges.

Over the next few weeks the...
