

LWF - The Power of Collaboration

Video LWF August 11, 2017

We all have the power to make a difference for our waters, says LWF's executive director, Alexis.

Every year (and especially during our busy summertime) we are privileged to have the opportunity to connect with people who are taking action for the health of our lakes and rivers. Thank you to all our supporters for inspiring us with your passion and commitment. You are making solutions possible.
