Have a great idea for a project that can help save our lake? We can help make it happen!

LWF's Stewardship, Research and Education Grants Program supports projects working to improve water quality in Lake Winnipeg and its watershed – particularly those which address one or more of the eight key actions to reduce nutrient loading identified in our [Lake Winnipeg Health Plan](#).

[Past projects](#) have included educational resources, water-quality sampling and monitoring programs, video projects and various research projects.

The deadline for Spring 2015 grant applications is March 1, 2015. More information – including downloadable application forms – is available [here](#).
